PROFILE

Full-stack developer who designed, built and runs **OrderKhaja** — a live, multi-tenant SaaS for QR ordering and billing in cafés and restaurants across Nepal. I own the whole product: **PostgreSQL security policies, payment integrations, CI and backups,** and the interface staff use in the middle of a rush. BIM student at Tribhuvan University, seeking a full-stack internship on a team that ships real products.

FLAGSHIP PRODUCT

OrderKhaja

Founder & sole engineer · orderkhaja.com

● LIVE SEP 2026 – PRESENT

Next.js | React | TypeScript | Supabase | PostgreSQL | Tailwind CSS | Vercel | GitHub Actions

SCAN TO TRY LIVE

- Built a **multi-tenant QR ordering & billing SaaS**: guests scan a table QR and order with no app (English or Nepali); cafés sign up and go live the same day, on plans priced by monthly orders.
- Shipped a **real-time floor view** with ringing order alerts and web push, a kitchen screen, **thermal KOT printing**, bills with 13% VAT and service charge, staff roles, discounts, loyalty, stock and day-close reports.
- Integrated **Khalti, eSewa and Fonepay/bank QR** payments, including EMV QR codes with the bill amount pre-filled, plus subscription billing with free trials.
- Enforced **tenant isolation with PostgreSQL row-level security**; ran my own security audit and shipped a hardening migration — server-side order-total verification, column-level grants, rate limits and security headers.
- Automated delivery and operations with **GitHub Actions**: lint, type-check, tests and build on every push; daily database backups, monthly restore tests and 15-minute uptime checks.

EARLIER PROJECTS

PulseMart | Full-Stack E-Commerce Platform

Next.js | React | Node.js | Express | PostgreSQL | Tailwind CSS

- Built the full shopping flow — catalog, cart, checkout with **online and cash-on-delivery** payment, and order tracking.
- Secured accounts with **email-OTP sign-up and JWT sessions**; designed an **AI admin assistant** that confirms before writing and logs every action.

Flavoro | First Full-Stack Build

PHP | MySQL | HTML | CSS | Tailwind CSS | Bootstrap

- Online food ordering and restaurant management with **inventory, financial tracking and role-based access** for staff, in a mobile-responsive interface.

TECHNICAL SKILLS

LANGUAGES

TypeScript | JavaScript | SQL | PHP | Python | Java | C

FRONTEND

Next.js (App Router) | React | Tailwind CSS | PWA

BACKEND & DATA

PostgreSQL | Supabase | Node.js | Express | MySQL

INTEGRATIONS

Khalti | eSewa | Fonepay QR | Web Push | KOT printing

DELIVERY

Vercel | GitHub Actions | Backups & restore testing

ENGINEERING

- Multi-tenant SaaS design
- Row-level security
- Payments & billing
- Real-time UIs
- Testing & CI/CD
- Security auditing

EDUCATION

Bachelor of Information Management (BIM)

Tribhuvan University

Expected Graduation: 2026

STRENGTHS

- ✓ Ships end to end, alone
- ✓ Clean, maintainable code
- ✓ Learns fast, owns problems
