Express

Web & UI/UX

HTML, CSS, Tailwind
CSS, Bootstrap

Databases & Platforms

MySQL, PostgreSQL,
Supabase

STRENGTHS

Strong problem solver
Clean & maintainable code
Eager to learn & adapt

ABHISHEK DHIMAL

FULL-STACK DEVELOPER | PROBLEM SOLVER | QUICK LEARNER

PROFESSIONAL PROFILE

Motivated Bachelor of Information Management (BIM) student with strong hands-on experience in full-stack web development, including building and shipping a subscription-based SaaS product. Passionate about building functional business applications and designing clean, modern user interfaces. Seeking an internship opportunity to leverage my technical skills in modern web technologies in a professional, fast-paced development environment.

KEY PROJECTS

Cafe SaaS — QR Code Table Ordering Platform

[Next.js](#) • [Supabase](#) • [PostgreSQL](#) • [Tailwind CSS](#)

- Built a multi-tenant, subscription-based SaaS platform that lets any cafe or restaurant sign up and go live in minutes, replacing phone/paper-ticket ordering.
- Implemented QR-code table ordering, live order tracking, menu and table management, and daily revenue summaries for restaurant owners.
- Designed subscription billing with trial expiry and local payment gateway (eSewa) integration, and enforced data isolation between restaurants using row-level security policies.

PulseMart — Full-Stack E-Commerce Platform

[Next.js](#) • [React](#) • [Node.js](#) • [Express](#) • [PostgreSQL](#) • [Tailwind CSS](#)

- Built a complete e-commerce flow: product catalog, cart, checkout with online and cash-on-delivery payment, and order tracking.
- Implemented secure authentication with email-OTP verification, JWT sessions, and self-service password reset.
- Designed an AI-powered admin assistant that answers natural-language questions about the store and can take confirmed write actions, backed by a full audit log.

Flavoro — Online Food Ordering & Restaurant Management System

[PHP](#) • [MySQL](#) • [HTML](#) • [CSS](#) • [Tailwind CSS](#) • [Bootstrap](#)

- Developed a comprehensive full-stack business application for seamless restaurant management.
- Engineered and integrated core backend modules, including inventory management, real-time financial tracking, and role-based access control.
- Designed a modern, mobile-responsive user interface aimed at providing a professional user experience.
